a way students are taught.

Successful Intelligence Can Be Taught

What is Successful Education for Creative Engineers?

Successful Education is a new engineering education paradigm developed by Tomasz Arciszewski and proposed in his ground-breaking new book *"Successful Education: How to Educate Creative Engineers"*.

Question: As a dedicated educator how do you teach young people to be successful?

Answer: Teach them creativity.

Question: But how?

Answer: Read the book *"Successful Education. How to Educate Creative Engineers"*, which was already translated into Chinese and will soon be available in Polish and in Spanish.

Through Professor Tomasz Arciszewski's powerful ideas you will realize that **the new education paradigm is here now and is applicable not only to engineering but to all fields of higher education.**

Purpose

The purpose of Successful Education is to educate engineers who are creative and take pride in their work. They are leaders and innovators in society because they possess Successful Intelligence, which can be taught.

Discover a New Teaching Paradigm!

Mission

Our mission is to improve engineering education both in the United States and abroad. We strongly believe that in today's world all engineering educators should work together and share experiences in order to advance our profession and society as a whole.
